EFFORTLESS OPERATION

The push of a button on the sleek intuitive remote control is all it takes to operate your external shading system. Open, close or stop your patio awning, louvered roof or external blind at the desired position. Turn lighting and heating on or off. Even select fully automatic mode, with your external shading system positioning itself based on the ambient conditions when equipped with our smart sensors.

Featuring secure radio technology with a range of over 200m in open space or 20m through two concrete walls you are guaranteed operating convenience from the comfort of your chair. For the ultimate convenience why not upgrade to smartphone operation allowing you to enjoy hassle free functioning and positioning of your external shading system wherever you are, at home, work or away.

SNOW SENSOR

PATIO AWNINGS

Both practical and stylish, a Caribbean Blinds patio awning outstretches to provide instant shade and shelter on your terrace, keeping you cool on even the hottest of Summer days along with providing optimum protection from damaging UV rays and those unexpected and often persistent rain showers*. Your adjoining internal room also benefits from a reduction in solar heat gain and the elimination of glare, with the view to the garden maintained.

Optimum heat block is provided ensuring the terrace and adjoining internal room remain cool

Upto **99% UV block** ensures you can enjoy the sun safely along with preventing furnishings from fading

Bright light is diffused which **eliminates glare** to the covered outdoor and indoor space

Shelter is provided from rain showers* and additional privacy is created on the terrace

* Subject to a pitch (angle) of 14 degrees or greater as set out in European Directive EN13561

A large, two-story brick house with a white awning over the patio. The house features a dormer with two windows and a skylight. The patio has a white table and chairs. The house is surrounded by lush greenery, including trees and a lawn. A brick planter with purple flowers is in the foreground.

**Live.
Love.
Laugh.**

CUBA

PATIO AWNING

The Cuba awning is the crème de la crème of our range, with its contemporary rectangular, flush fitting full cassette design that appears an integrated part of the façade and neatly conceals the awning when retracted. The heavy duty folding arms with drop forged joints, feature quadruple stainless steel sheathed cables tensioning twin springs to ensure optimum fabric tension at every position, suitable for the most demanding of applications. Concealed fixing brackets and screwless alu end plates elegantly finish the awning off, whilst optional LED lighting can be built onto the underside of the cassette.

TECHNICAL OVERVIEW

WIDTH:
upto 7.0m

PROJECTION:
upto 3.75m

HARDWARE COLOUR:

TORTOLA

PATIO AWNING

With its streamline cylindrical shape and robust design, the Tortola patio awning is our most popular residential awning. Powerful folding arms featuring twin springs tensioned via double stainless steel sheathed cables keep the fabric taut at every position, whilst the unobtrusive full cassette casing protects the fabric and operating mechanism when the awning is retracted away. Concealed brackets (optional) and cast end caps provide an aesthetically pleasing finishing touch.

TECHNICAL OVERVIEW

WIDTH:

- Any other RAL colour

OPERATION:

- Motorised - Remote Control
- App Control
- Manual - Crank Handle

DURABILITY:

- Beaufort 5 - fresh breeze

For more information cbsolarshading.co.uk

Patio Awnings shown installed on bespoke load bearing spreader plates (left & middle awning) and cantilever brackets (right awning) for a safe attachment to single storey properties

ANGUILA

PATIO AWNING

Our entry level Anguilla patio awning is the little brother to the Tortola model and boasts many of the same features, including a slim cassette casing that discreetly conceals the awning when not in use and robust double spring loaded arms tensioned via twin stainless steel sheathed cables for optimal fabric tension whether part or fully extended. Ideal for mounting where space is limited due to its reduced dimensions and convenient end block construction.

TECHNICAL OVERVIEW

WIDTH:
upto 4.0m

PROJECTION:
upto 2.5m

HARDWARE COLOUR:

- Anthracite Grey RAL 7016
- White RAL 9016
- Any other RAL colour

OPERATION:

- Motorised - Remote Control
- App Control
- Manual - Crank Handle

DURABILITY:

- Beaufort 5 - fresh breeze

PUERTO RICO PERGOLA AWNING

Full sun, partial shade or complete shelter, the Puerto Rico Pergola awning gives you complete flexibility and freedom over your outdoor space. The slimline pergola framework features a sliding fabric roof that can be adjusted to any position and when fully extended the integrated guttering built within the leadrail ensures effective water drainage from the fabric into and out of the post uprights. Optional roller fabric supports spanning between the side guides offer increased durability for exposed locations and can have integrated LED ambient lighting.

LOUVERED ROOFS

Louvered roof pergolas under the exclusive brand Outdoor Living Pod™ from Caribbean Blinds are the ultimate luxury outdoor living solution and as the name suggests, for people who want to **live life outdoors**. From closed roof to open at the touch of a button, the Outdoor Living Pod™ will adapt to the changing weather and your requirements all year round. No other terrace canopy can offer the same flexibility and possibilities as the original Outdoor Living Pod™.

Rotate the louvers angled towards the sun for **maximum sunlight** beneath the structure

Rotate the louvers angled away from the sun for **cooling shade** beneath the structure

Rotate the louvers 90 degrees for **optimum ventilation** from heat build up beneath the structure

Close the louvers for **complete rain and snow protection** under the structure

**Relax.
Entertain.
Unwind.**

Stylish 'S' shaped louvers take up minimal space when fully retracted.

PRESTIGE OUTDOOR LIVING POD™

For those who appreciate limitless outdoor living, our top of the line Prestige Outdoor Living Pod™ offers all the freedom you could desire from a terrace canopy. Thanks to its ingenious design, not only can you play with sun and shade by rotating the louvers through 135 degrees but you can fully retract the roof for the complete open air alfresco experience and maximum sunlight. And when closed, the louvers lock together providing shelter from the rain and even snow.

Optional side screens neatly concealed in the structure provide additional shade and shelter.

DELUXE OUTDOOR LIVING POD™

Freestanding in the garden, lean-to attached to the property or built into an existing structure, with the ability to seamlessly link modules together to cover outdoor spaces of all sizes, the award winning Deluxe Outdoor Living Pod™ is the most versatile of our aluminium louvered roofs. It's large 21cm wide roof louvers rotate through 150 degrees, stopping at the desired position to provide the perfect levels of light or shade on your terrace and when closed the louvers form an entirely watertight covering.

This slim framed pergola will seamlessly integrate and become an integral part of your garden.

CLASSIC OUTDOOR LIVING POD™

The minimalist design of the Classic Outdoor Living Pod™ make this pergola canopy a favourite on the terrace or in the garden. The streamline louvers which form a perfectly aligned watertight roof when closed, rotate upto 150 degrees, stopping at any position, allowing you to enjoy as much light or shade beneath the structure as you desire along with providing ventilation from heat build up beneath. For larger outdoor spaces, multiple modules can be linked together.

Rotating louvers provide precise sun control and are completely watertight when closed

Integrated guttering ensures effective water drainage from the roof to the nominated post uprights

Superstrong construction from corrosion resistant, powdercoated, extruded aluminium for durability

Streamline framework with clean elegant lines and no visible fixings ensures a flawless finish

Concealed base plates inside the post uprights for a seamless attachment to the ground

Powerful built in motors operated via either remote control or phone app for effortless functioning

Dimmable LED lighting integrated in the roof louvers or cross beams for the perfect ambience

Infra-red heaters with low glare elements mounted to the cross beams or posts provide instant warmth

Inset posts create a striking overhanging roof or extra posts can create doorways *Deluxe Model Only*

Windproof side screens protect from strong breezes, driving rain and low level sunlight, along with offering privacy

Customise your Outdoor Living Pod™ with our optional extras to create a cosy and pleasant environment on your terrace all year round

EXTERNAL BLINDS

Creating a physical barrier in front of and stopping the sun's energy even reaching the glazing, our innovative external roller & roof blinds are the most effective way to regulate solar heat and light, preventing unwanted solar heat gain and diffusing incoming light to create a thermally and visually comfortable indoor space, with the view and connection to the outside maintained*.

Blocking up to 92%* of the sun's near infra-red heat rays, our external blinds can reduce interior room temperatures by more than 10 degrees centigrade, which in turn can reduce the energy consumption otherwise needed to cool down a hot room by more than 80%.

*Performance data is purely indicative based on tests carried out to EN 13363-1 with double low-e glass and using Twilight Pearl solar control mesh dimout fabric

A photograph of a modern house with a dark grey facade and brick accents. The house features a gabled roof with a brick chimney and a large window. The house is surrounded by lush greenery, including trees and bushes. The sky is blue with some clouds.

ANTIGUAN

EXTERNAL ROLLER BLIND

The Antiguan external roller blind with its slim profiles and sleek design is a seamless addition to any vertical glazed area. Zip locking technology built into the side guides, physically locks the fabric in place at every position rendering the blind windproof along with preventing any light shining between the edge, whilst the weighted leadrail ensures the fabric stays under optimum tension. A clever two part side guide conceals all fixings and optional full height spacers can set the blind off the façade to overcome protrusions such as vents and handles. A full cassette headbox discreetly hides the blind when not in use.

CAYMAN

EXTERNAL ROOF BLIND

The Cayman external roof blind is able to run on roof glazing of any slope thanks to its concealed tensioning system. Tear resistant dyneema cables tension a hi-tensile double coiled spring, which in turn keeps the fabric taut at each position. The leadrail runs within U shaped side channels to ensure the blind runs perfectly square whilst also preventing any light leakage. A range of mounting brackets allow installation to every type of glazed roof, whilst height adjustable brackets allow roof vents to be overcome. When retracted away, the full cassette casing neatly encloses the fabric ensuring a low maintenance solution.
